VIKASH JAISWAL

B.Sc. B.Ed. Student | Aspiring Mathematics Educator

Prayagraj, Uttar Pradesh, India • 8173996121 • b24edm014@iitj.ac.in
LinkedIn Profile

CAREER OBJECTIVE

Motivated B.Sc. B.Ed. student at IIT Jodhpur with a strong interest in Mathematics and education. Enjoys explaining concepts in simple ways and creating engaging learning experiences. Eager to develop teaching skills and explore activity-based and technology-supported learning.

EDUCATION

Indian Institute of Technology Jodhpur — B.Sc. B.Ed., 3rd Year (Currently Pursuing)

Rani Revati Devi SVNIC, Rajapur, Prayagraj — Class XII: 87.4% (2023) | Class X: 90% (2021)

TEACHING EXPERIENCE

Informal Teaching Experience: Began helping younger students while in Class 8; taught approximately 15–20 students from classes below 5th/6th. Helped them understand basic concepts and resolve doubts, developing communication and explanation skills.

ACADEMIC PROJECTS & TEACHING-LEARNING ACTIVITIES

Treasure Hunt — Projectile Motion Learning Game (Scratch): Created an interactive story-based Scratch activity in which projectile motion was introduced through a treasure-hunt storyline. Helped learners explore parabolic trajectories, velocity components and gravity through engaging questions. Collaborated with Yash Soni and Hariom Kumar.

GRAVITRON — The Equilibrium Machine: Built a hands-on physics teaching model with a balancing beam and movable weights to explore centre of gravity, balance conditions and stability.

Average Speed — Visual Animation: Developed a visual animation using moving vehicle models to explain distance–time relationships and distinguish average speed from instantaneous speed.

Interactive Edpuzzle Video: Prepared a digital video-based learning module with embedded checkpoint questions, interactive prompts and feedback to support self-paced learning.

Magnus Effect Teaching Activity: Designed an inquiry-based STEM demonstration connecting airflow, pressure differences and curved-ball motion through hands-on exploration and mathematical modelling.

Universal Inquiry Board — TLR Concept: Developing a low-cost interactive classroom resource to encourage hands-on exploration and student participation in Mathematics and Science.

SKILLS

Technical: C++ (Basic), Scratch, Computational Thinking, Digital Learning Tools
Teaching: Mathematics, Concept Explanation, Student Engagement, Activity-Based Learning
Communication: Presentation, Collaboration, Communication

AREAS OF INTEREST & LANGUAGES

Interests: Mathematics Education, STEM Education, Educational Technology, Teaching Learning Resources (TLR)
Languages: Hindi, English
